

Supplier guideline — KindNesta product templates

Share with every supplier:

File	When to use
partner-product-template.csv	Always — one row per SKU (core listing)
partner-product-evidence.csv	Optional — only if you make green claims, want a stronger Kindness Score, or KindNesta asks
KINDNESS-SCORE-STANDARD.md	Reference for how scoring works
partner-score-checklist.csv	Optional quick Pass/Fail self-check

Open CSVs in **Google Sheets** or **Excel**. Keep the header row. **Leave any column blank if it does not apply** — do not invent data.

1. Before you start

1. Decide the **public claims** you want KindNesta to publish (specific only).
2. Gather photos and any certificates you already have.
3. Do **not** use *eco-friendly*, *green*, *sustainable*, or *climate neutral* unless you can prove them under EU EmpCo rules — prefer specific claims with % and scheme names.

Good: Made from 100% GRS-certified recycled cotton paper

Bad: Eco-friendly product

2. Core template (required)

partner-product-template.csv — enough to list the product and start a conversation.

Column	Notes
sku	Your article / SKU code
title	Clear name buyers will see
brand	Your company / brand
category	Free text (e.g. packaging, home, personal-care, food, apparel-trims, other)
subcategory	Optional finer aisle
shortDescription	1–2 sentences
bulletPoints	3–5 bullets separated by
description	Longer listing copy

materials	What it is made of
dimensions / weight	Optional
image / imageGallery	Photo filenames (for gallery)
publicClaims	Exact wording KindNesta may publish
certNames / certNumbers / certExpiryDates / certFileNames	Only if you have certs — otherwise leave blank
countryOfManufacture	Where it is made
price / currency / unit / packSize / moq	Optional & private — not shown on the public site
contactEmail / dateSubmitted	Who we should reply to
notes	Anything else — variants, lead times, exclusions

Variants: one row per SKU. Mention the parent product in `notes` if helpful (e.g. “Style 2 of Hangtag family”).

3. Evidence template (optional)

`partner-product-evidence.csv` — match rows by `sku` to the core sheet.

Use this when:

- You claim recycled / organic / FSC / similar content, **or**
- You want KindNesta to score the product beyond a basic provisional listing, **or**
- We ask for it during review

Every evidence column can be blank or `N/A`. Only fill what is true for your product.

Typical modules (fill only what fits):

Topic	Columns
Recycled / bio / plastic	recycledContentPercent, recycledContentType, recycledCertScheme, bioBasedPercent, virginPlasticPercent, bomPercentByWeight
Chemicals (EU)	reachCompliant, svhcAboveThreshold, svhcList, oekoTexOrEquivalent, pvcFree
Circularity	designForRecycling, endOfLifeRoute, ppwrRecyclabilityGradeIntent, reuseOrRefill
Shipped packaging	shipPackMaterials, shipPackWeight, shipPackRecycledPlasticPercent, overpackJustified, sortingLabelPlan
Traceability	tier1SupplierName, mainMaterialOriginCountry, batchTraceability, careAndEndOfLifeInstructions
Gate self-check	A1–A7 as PASS / FAIL / N/A
Score proposal	proposedKindnessScore, kindnessScoreNotes, evidencePackFileNames

Any **FAIL** on a gate → KindNesta will cap the score at **49** and block related claims until fixed.

4. Certificates (only if you make those claims)

If you claim...	Usual proof
Recycled content	GRS or RCS
Organic cotton	GOTS
Responsible paper / forest fibre	FSC or PEFC
Tested for harmful substances (textiles)	OEKO-TEX Standard 100
Broad excellent eco performance	EU Ecolabel / Blue Angel

You can list products **without** eco-certs. Then avoid recycled/organic/FSC-style claims; the Kindness Score stays lower until evidence arrives.

5. What to send back

1. Completed `partner-product-template.csv` (required)
2. `partner-product-evidence.csv` (optional)
3. Photos + any certificate PDFs named in the sheets

Email subject: KindNesta product submission – [Brand] – [Date]

Send to: kindnesta@proton.me

6. How KindNesta uses your data

1. Reviews the core listing for clarity and claim hygiene
 2. If evidence is provided, runs gate checks and scores pillars (`KINDNESS-SCORE-STANDARD.md`)
 3. Publishes product + Kindness Score (**provisional** until evidence is verified)
 4. Only publishes **specific** claims from `publicClaims`
-

7. Quick checklist before send

- ☐ Core sheet: one row per SKU
- ☐ No generic “eco / green / sustainable” wording
- ☐ Blank columns left blank (not filled with guesses)
- ☐ Cert claims have matching numbers + PDFs (if any)
- ☐ Photo filenames match `image` / `imageGallery`
- ☐ Evidence sheet only if relevant — same `sku` values as core

Questions? kindnesta@proton.me or the website contact form.
